POWER BUSHING ASSEMBLIES
8.7kV CLASS, 95kV BIL, 10.25" CREEP

These bushings are designed for transformer and special power apparatus applications. **The electrical ratings given are based on use in a liquid filled transformer with the lower end of the bushing under oil.** Porcelain is gray glazed all over and the top skirts are designed for outdoor application.

Spade casting is pure copper and tin-plated. 97% min. electrical conductivity guaranteed. Clamps and washers are non-magnetic. Constant gasket pressure to top terminal is maintained by disc springs to compensate for the thermal expansion and contraction of the copper stud. Nitrile (Buna-N) gasket is standard. For ordering assemblies with the cork-rubber composition gaskets, add the suffix "C" to the part number.

Bushings are designed for mounting in ϕ3.13 (min.) hole.
